Skills

Languages

- Japanese
  - Native
- English
  - Conversational
  - TOEIC 875 (Apr 2019)
  - TOEFL 85 (Jun 2017)

Programming Languages & Frameworks

- Python
- FastAPI
- Triton Inference Server
- JavaScript/TypeScript
- React
- Next.js
- NestJS
- Terraform

Database

- PostgreSQL

Cloud/Infrastructure

- GCP (Google Cloud Platform)
  - Cloud Run
  - Cloud Build
  - Cloud SQL
  - GKE (Google Kubernetes Engine)
  - Cloud Composer
- GitHub Actions

Education

Date	School
Apr 2011 - Mar 2014	Meizen High School, Fukuoka Prefecture, General Course

Date	School
Apr 2015 - Mar 2017	Kyoto University, Faculty of Law
Apr 2017 - Mar 2019	Kyoto University, Faculty of Economics (Transferred in 3rd year)
Oct 2019 - Sep 2021	Kyoto University, Graduate School of Informatics, Department of Intelligence Science and Technology Cognitive Information Science Laboratory (Prof. Shin'ya Nishida), Master's Program

Work Experience

Career Summary

As an engineer, I have not only developed features but also considered which PoCs and new features would become competitive advantages for the service and contribute to KPI improvements such as revenue growth, working backwards from business strategies. In the New Business Development team, I worked on improving product logic to reduce designers' production work, API development, and model serving. Also, as a leader of an ML team of 4-5 members, I led strategic planning and research roadmaps for updating internal product search functionality and new features, achieving quantitative results such as doubling search feature usage rates. In the Auto Generation team, I participated in 4 auto-generation logic projects in about 9 months, achieving service-level success rates in 3 of them. For example, I achieved 90% + quality in banner ad image auto-generation for a certain pattern within approximately 2 months. I built high-speed experiment pipelines and annotation-based improvement workflows, balancing development speed with quality improvement. I am currently the development lead for an internal annotation tool, expanding the tool's reach by deploying it to an overseas region and supporting confidential data. Also, as an operating member of DSOps training (2023–2025, serving as operating leader in 2024), I built a system where participating in training leads to actual projects in the field, contributing to organizational growth.

Period	Organization	Position
Aug 2018 - Aug 2020	Hitachi, Ltd. / Kyoto University Lab	Student Researcher (Part-time)
Jan 2021	CyberAgent / Kiwami Prediction AI Division / Prediction Team	ML/DS Intern
Apr 2022 ~ Mar 2025	CyberAgent / Kiwami AI Division / New Business Development Team	ML Engineer
Apr 2025 ~ Dec 2025	CyberAgent / Kiwami AI Division / Auto Generation Team	ML Engineer
Jan 2026 ~ Present	CyberAgent / AI Creative Company	ML Engineer (Development Lead, Internal Platform Tool)

Side Work / Freelance

Period	Organization	Position
Jul 2026 ~ Present	canuu (Side Work / Freelance)	Engineer (AI-OCR Feature, from PoC to Production)
